## Droplet

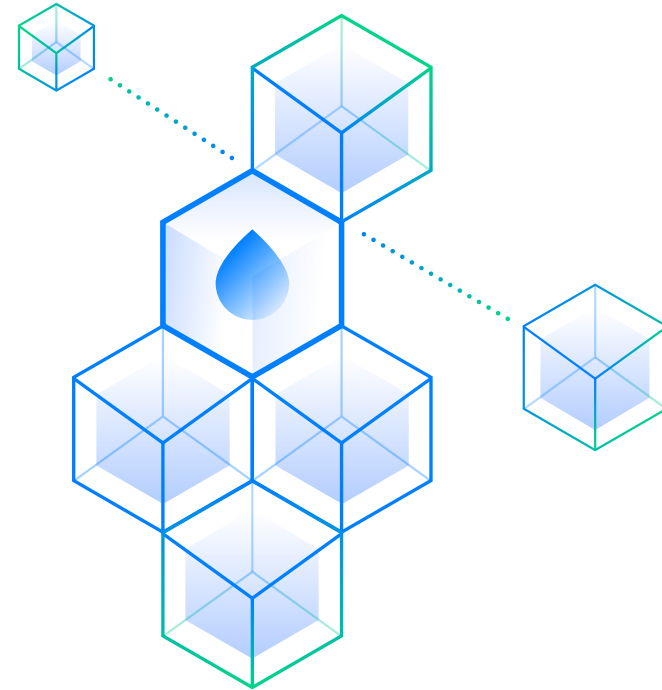

Deploy an SSD cloud server in seconds via our intuitive control panel or flexible API. Quickly scale from one to thousands of Droplets to run your production workloads.

[Learn More](#)

## Block Storage

Attach highly available and persistent block storage to your Droplet. Never run out of space—not with volumes up to 16TB and the ability to attach multiple volumes to a Droplet.

[Learn More](#)

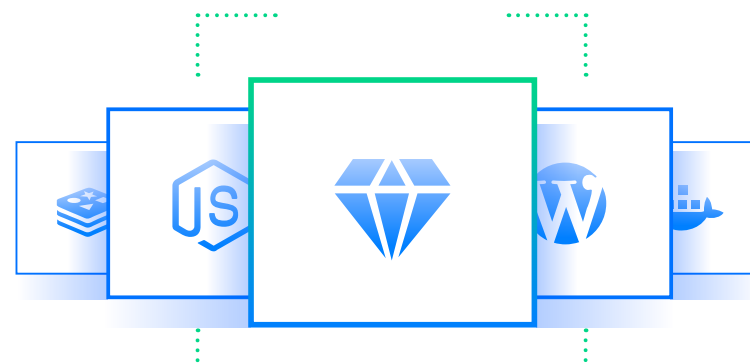

Create, automate, and manage a robust infrastructure with DNS, floating IPs for failover, private networking, and IPv6. All backed by our **40Gbps** network to each physical node.

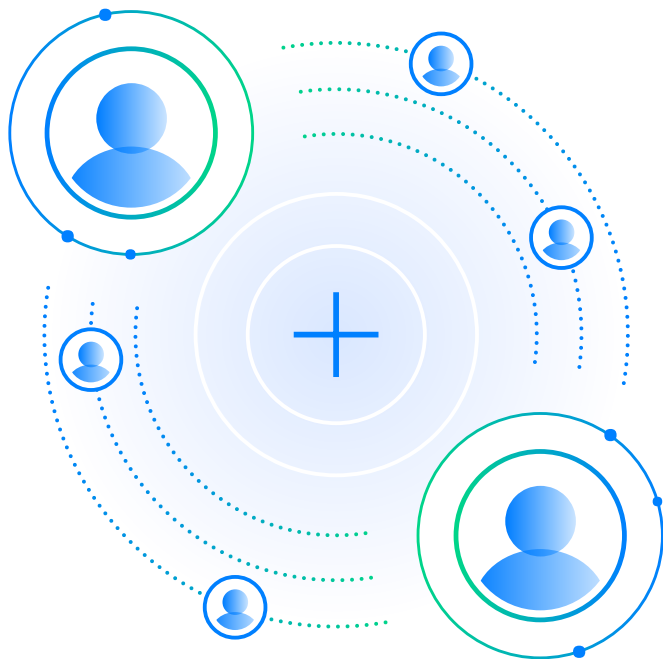

[Learn More](#)

## Apps

Skip the installation and configuration, get straight to deploying your apps by using one of our pre-built images supporting Node.js, Rails, Redis, MongoDB, Cassandra, Docker, and many more.

[Learn More](#)

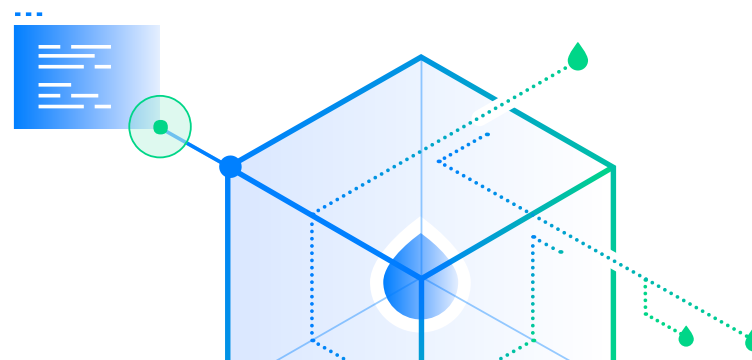

With DigitalOcean Teams you can invite and manage users, ensure security with two factor authentication, and control your resource spend with centralized billing.

[Learn More](#)

Our restful API empowers you to automate and scale your workloads. Access all of the functionality that our cloud offers in an unified way.

Is your team interested in deploying or migrating a large environment? We can help.
